

More About Tiki Cat

Human Grade

All formulas are manufactured in a human-grade factory and are truly human-grade quality. All products are made with whole meat from preferred, premium portions of seafood that are left whole and intact versus traditional meatloaf or other mystery meat pates. All meat ingredients are called out in the primary flavor names without mystery or unnamed "ocean fish", chicken and other inferior filler meat sources.

Dolphin Safe Certification

We are registered with the International Dolphin Conservation Program (IATTC), which sends a conservationist inspector on the vessels to ensure appropriate procedures are met to maintain this status. The US government does not regulate the use of the "Dolphin Safe" logo making it difficult to know who is acting responsibly and truly "Dolphin Safe".

Meets Special Dietary Requirements

Our formula's certificate of analysis has been reviewed and approved by many Vets across the nation in behalf of "special diet" cats that have a history of various health problems including Urinary Blockage, Kidney Stones, Irritable Bowel Syndrome, Diabetes and Loss of Appetite.

Loss of Appetite

Vets treating cats that are suffering loss of appetite are now recommending Tiki Cat to their clients. Cats that were on feeding tubes or forcibly fed have been known to return to eating on their own and return to normal activities after being introduced to Tiki Cat.

Superior Palatability

Tiki Cat formulas have gone through extensive long-term palatability studies to ensure they are the most palatable recipes on the market for cats.

Research and Development

Petropics has successfully identified and utilized the portions of each fish that are the most palatable to cats. Cats were the authority in the recipe development. They NEVER freeze their seafood; it goes straight from the vessel into processing which enhances the quality and flavor. There are more natural, holistic, and organic foods on the market than any other time in history. If a cat won't eat the food, the healthy nature of the food doesn't make a difference. Petropics is committed to bringing whole, natural foods to market that promise happy, returning customers.

All formulas meet the nutritional levels established by the AAFCO cat food nutrient profiles for adult maintenance.

Hawaiian Grill, Ahi Tuna

Ingredients - Tuna, Tuna Broth, Sunflower Seed Oil, Dicalcium Phosphate, Choline Chloride, Taurine, Vitamin E Supplement, Zinc Sulfate Heptahydrate, Ferrous Sulfate Mono-Hydrate, Thiamine Mononitrate (Vitamin B1), Nicotinic Acid (Vitamin B3), Calcium Panto-Thenate, Manganese Sulfate Monohydrate, Vitamin A Supplement, Potassium Iodide, Copper Sulfate Pentahydrate, Vitamin D3 Supplement, Riboflavin Supplement (Vitamin B2), Pyridoxine Hydrochloride (Vitamin B6), Folic Acid, Vitamin K3, Vitamin B12 Supplement
