

Skin & Itch Relief

Homeopathic remedy provides temporary relief from constant scratching, itching, gnawing and hair loss caused by allergies. Helps to detoxify the skin from the inside, leaving the coat thick and shiny.

INGREDIENTS

Graphites 6c & 30c: (Black Lead)	Wet, oozing sticky eczema on skin
Pulex Irritans 6c & 30c: (Common Flea)	Prickly itching
Rhus Toxicodendron 6c & 30c: (Poison Oak)	Pruritic skin associated with rash
Staphysagria 6c & 30c: (Stavesacre)	Violent itching, thick scabs and eczema
Sulphur 6c & 30c: (Sublimated Sulphur)	Smelly skin conditions aggravated by heat
Urtica Urens 6c & 30c: (Stinging Nettle)	Urtica from chewing and licking

INDICATIONS: Atopy or other allergic condition. Constant, chronic scratching, itching and chewing. Grass, pollen and house dust allergies, airborne allergies, and seasonal allergies.

FORMS: Liquid **PACKAGE SIZE:** 15 ml bottle

DOSING:

DOGS/CATS: Under 20 lbs/10 kg, 5 drops; 21-60 lbs/ 10-30 kg, 10 drops; 61-100 lbs/ 30-45 kg, 15 drops; over 100 lbs/45 kg, 20 drops.

In acute cases (those with sudden onset), the doses can be given every 15 minutes, up to 4 doses.

For cases that are not acute (chronic, long term problems), one dose 3 times daily.

Once a response is seen, administration should be reduced to 2 times daily and eventually once daily. If reduction causes symptoms to worsen, original dosing may be continued a little longer before reducing. If a remedy is working well and dosing is not reduced, an aggravation of symptoms from overuse may occur. Stopping the remedy for 3 days will reverse the symptoms, and then treatment can begin as if using for the first time, weaning down as mentioned above.

Under 1 lb: All pets under 1 lb should be dosed by putting 2 drops in the drinking water daily.

SMALL MAMMALS: Rabbits, ferrets, hamsters and pot bellied pigs can be dosed by weight as for cats and dogs in previous section.

For severe cases a drop can be diluted in 1 ml of water or other oral rehydration fluid and given to the patient orally, taking care to avoid aspiration of the fluid into the respiratory tract by the patient. 3 doses whose volume is appropriate to the size of the patient should be given from the

diluted product over a 24 hour period, e.g. 2 drops for a mouse, 4 drops for a large guinea pig. For acute cases it can be repeated as for cats and dogs in previous dosing section.

ADMINISTRATION: Optimally, the liquid preparation should be dropped directly into the mucous membrane of the mouth including lips; ideally in dogs by pulling out the labial pouch, and in cats by raising the head until the mouth opens. Where an animal finds this distressful, or an owner is unable to comply, the medication can be put in the food, water or milk. Where animals are sensitive to the odor of the alcohol preservative, a 10-20 minute period should be allowed for dilution and evaporation before the liquid or food is presented to the patient. Occasionally, animals will shake their heads as a response to the alcohol preservative; cats may salivate excessively and in these cases, presenting it in food, water or milk works.

ADVERSE EFFECTS AND CONTRAINDICATIONS: None known, other than reversible effect of overdosage. Overdosage will result in a return of symptoms after the symptoms have initially disappeared. Where either increased anxiety or a return of symptoms occurs while on the medication, ceasing to use it will alleviate the effect. Patients who are hypersensitive to homeopathic preparations will show response to a single dose, which may not need to be repeated for some time. For this reason therapy should always start with a single dose and should a major response be seen, therapy should not be recommenced until symptoms relapse, and then only a single dose given for maximum effect. Although there is no evidence that there are any safety issues, extra care should always be taken when dealing with pregnant animals. Should a suspected adverse reaction be seen or advice needed, please contact HomeoPet LLC (contact information at bottom of sheet).

DRUG INTERACTIONS: None known for animal use only. Keep out of reach of children.

PHARMACEUTICAL PRECAUTIONS: Store at room temperature, out of direct sunlight, and away from strong odors.

USER SAFETY: No adverse effects have been recorded. There have been reports to the company of beneficial rather than adverse effects. As homeopathics are active in humans, care is advised when handling product. Although a long history of homeopathics used in humans shows a very high safety margin.

ENVIRONMENTAL IMPACT: To date none found
