

Wholistic Diatomaceous Earth (DE) consists of the dried skeletons of microscopic sea creatures called diatoms. Wholistic Diatomaceous Earth is a safe, non-chemical alternative to chemical dewormers and is an effective adjunct to any worming program.

Wholistic Diatomaceous Earth (DE) works by mechanically destroying parasites and is a safe, non-chemical alternative to chemical pest control.

Composed of the fossilized remains of microscopic sea shells called DIATOMS, Wholistic Diatomaceous Earth (DE) kills insects by puncturing the insect's exoskeleton (outer protective layer) eventually causing death.

Diatomaceous Earth is Mother Nature's product! It poses no risk or harm to the environment or to our pets.

- Controls worms and internal parasites without chemicals
- Wholistic Diatomaceous Earth (DE) is designated as foodgrade.
- Is a rich source of minerals
- Contains less than 1% quartz crystalline silica

Directions for Use:

Small Breeds (up to 30 lbs)..... 1/3 tsp daily
Medium Breeds (31 to 50 lbs).....1/2 tsp
Large Breeds (51 to 75 lbs).....1 tsp
Very Large Breeds (76 to 100 lbs).....1 1/2 tsp
Giant Breeds (over 100 lbs)..... 1 3/4 tsp

Can be given during meal time.
Administer daily.

Can also be sprinkled around living quarters for pest control. Use caution, application is a fine powder.

Do not inhale product. Dust may cause eye and respiratory irritation.

One teaspoon contains approximately 5 grams of Diatomaceous Earth
