Our peppermint flavored spray removes plaque and tartar from your pet's teeth--no toothbrush required! Made with all-natural, holistic ingredients, Oral Care Spray safely removes plaque and tartar, reverses oral disease, promotes healthy gums, brightens teeth and kills the bacteria that causes bad breath. When sprayed in your pet's mouth, the ingredients mix with your pet's saliva and completely coat their teeth and mouth. This process kills harmful bacteria and loosens plaque and tartar. Safe for cats and dogs of all breeds.

Start your pet on the road to better oral health today. PetzLife guarantees a 100% refund of your purchase price if you are not satisfied and when you return the unused portion

### Ingredients:

100% all natural - distilled water, grain alcohol, grapefruit seed extract, grape seed extract, rosemary oil, thyme oil, neem oil and peppermint oil, .

### Directions:

Spray in pet's mouth 1 to 2 times per day. For heavy build-up apply twice daily. Evening is best before bedtime. Spray directly on the largest area of tartar. You will notice your pet licking it's lips repeatedly. This helps mix the spray with your pet's saliva and the natural ingredients will coat all surfaces of your pet's teeth and gums. For best results withhold food and water 30 minutes before and after applications. After 30 days you can reduce to one application per day sprayed directly into your pet's mouth. After 60 days you can reduce to every 2nd or 3rd day. Your pet's plaque and tartar should not return with this recommended usage. You will know Petzlife oral spray is working when the tartar begins to leave the area between the gumline and the teeth. When the gum area is tartar free, it is no longer a breeding ground for harmful bacteria that can go directly into your pet's bloodstream. The last area to become tartar free is the middle of your pet's teeth. You will also notice that your pet's breath will be much fresher. Doggy and Kitty breath in most cases is gone!

### Recommended Dosage:

- \* Pets under 12 lbs: 2 sprays (one on each side of pet's mouth is recommended)
- \* Pets 12-35 lbs: 3 sprays
- \* Pets 30-60 lbs: 4 sprays
- \* Pets 60+ lbs: 5-6 sprays
