Our salmon flavored gel removes plaque and tartar from your pet's teeth--no toothbrush required! Made with all-natural, holistic ingredients, Oral Care Gel safely removes plaque and tartar, reverses oral disease, promotes healthy gums, brightens teeth and kills the bacteria that causes bad breath. The ingredients mix with your pet's saliva when applied on your pet's teeth and completely coats your pet's teeth and mouth. This process kills harmful bacteria and loosens plaque and tartar. Safe for cats and dogs of all breeds.

Start your pet on the road to better oral health today. PetzLife guarantees a 100% refund of your purchase price if you are not satisfied and when you return the unused portion.

Ingredients:

100% all natural distilled water, grain alcohol, wild salmon oil, xanthan gum, peppermint oil, grapefruit seed extract, grape seed extract, rosemary oil, thyme oil, neem oil.

Directions:

First month: if you have a pet with heavy plaque and tartar build-up PetzLife recommends applying first thing in the morning and again in the evening. PetzLife gel will be mixing with your pet's saliva and the natural ingredients will coat all surfaces of your pet's mouth. You will start noticing positive changes after just one week. If applying with a brush, a "soft" or finger brush is recommended. Note: The brushing action removes the plaque and tartar that has been softened by the gel's ingredients.

For best results, withhold food and water 30 minutes before and after application.

After a short time you should notice that the area at the gum-line is now free from plaque and the gums are looking healthier. This is a very important step because harmful bacteria is now blocked from entering your pet's bloodstream. You can now reduce to one application per day.

After 30 days when most or all of the build-up has been removed you can reduce to one application every 2nd or 3rd day. Your pet's plaque and tartar should not return with this recommended usage. You should also have noticed that your pet's breath has become much fresher.

Recommended Dosage:

- * Small dogs & cats: 1/3 tsp.
- * Medium dogs: 1/2 tsp.
- * Large dog breeds: 1 tsp.

Made in the USA.
